NIYATI SHAH

Problem Statement

The education sector is the backbone of societal progress , yet it faces persistent management challenges that hinder its growth and effectiveness .From administrative inefficiencies and resource allocation to student engagement and data mangement,these issues demand innovative solutiond to ensure a seamless learning experience for all.
Solution

A peer to peer doubt solving system can help learners get quick, relevant, and verified responses from fellow students or knowledgeable peers in real time. The system should facilitate seamless doubt posting, matching with relevant peers and encourage collaborative learning through incentives or reputation mechanisms.

# HOW IT WORKS

User Login

Doubt posting
and peer matching

Doubt solving
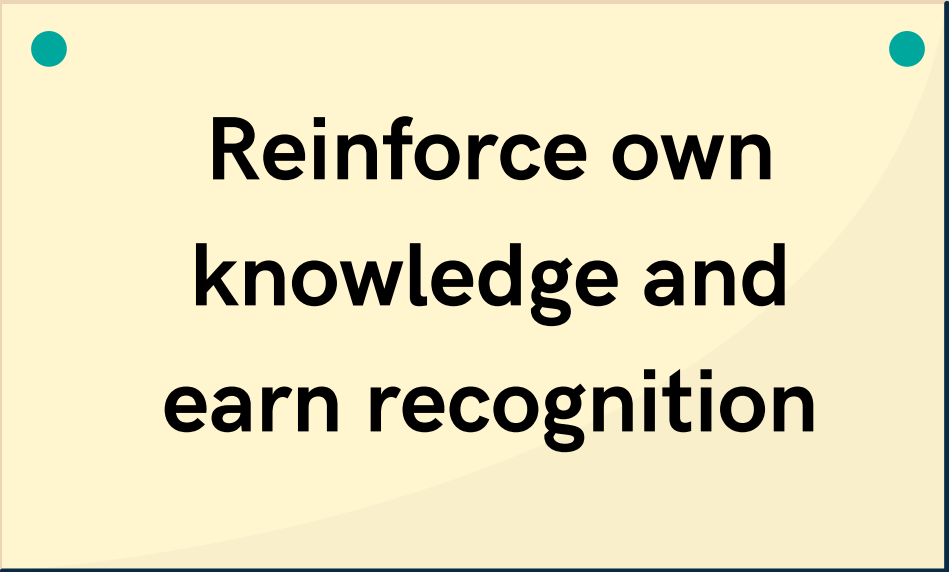

Discussion and
collaboration

Feedback and rating

BENEFITS

Enhances
critical thinking
and
problem solving
skills
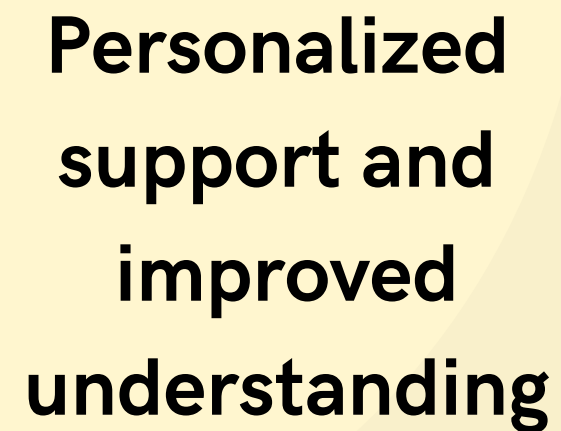

Encourages
collaboration
and teamwork

Faster doubt
solving and
access
to various
perspectives

Reinforce own
knowledge and
earn recognition
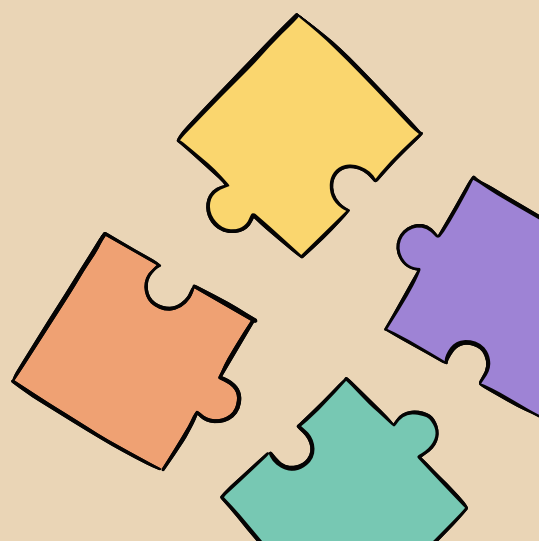

Personalized
support and
improved
understanding

Boosts
confidence
and
communication skills

KEY FEATURES

- Question forum
- Resource sharing
- Doubt solving through peers
- Temporary mentorship
- Feedback controls

- Privacy to your profile
- Profile verification
- Progress tracking
- Reporting and analytics
- Group discussions or team chat
